Division : PROPULSION DIVISION

NAL Project No. : P-1-317

Document No. : PD PR 1119

Date of issue : APRIL, 2011

Contents : Pages 30 Figures 3 Tables 4 References 3

External Participation : Aeronautical Development Agency, ADA

Sponsor : Aeronautical Development Agency, ADA

Approval : Project Leader / Head, Propulsion Division

Remarks : Restricted Document

Keywords : VCS, Refrigerant, Condenser, Evaporator, Compressor, Cooling, Superheating, Performance, Pressure Loss, Mass Flow

Abstract

The design data on heat transfer and friction factor for compact heat exchangers in two phase flows are not available in open literature. These data's need to be generated for compact plate fin heat exchangers through a dedicated vapour cycle test rig for use in VCS of an aircraft system. This report describes the design features of vapour compression refrigeration test rig and its accessories. This report was prepared in consultation with ADA Scientists and used to float the general tender for erection and commissioning of the test facility at Propulsion Division, NAL.
